BRGM

WELCOME

Objectives of STRACO2 FP7support action (1)

- Identifying **Science and Technology development priorities** in multiple aspects of technical applications and regulations for specific themes (certification, qualification, safety liability, incentives,...)
- **identify important issues for CCS-regulation** to be taken into account when developing a regulatory framework including: incentivisation schemes, financing mechanisms, international trade,...

Objectives of STRACO2 (2)

- Facilitate and increase Science and Technology cooperation at the EU level. This will strengthen the link with other ongoing CCS research activities (*DG RTD presentation*)
- to support the ongoing development and implementation of a regulatory framework in the EU and China for CCS technologies (DG ENV presentation)
- A EU/China bridge \longrightarrow China applicability

Work performed 5 WP

- Overview of current procedures, policies and systems (literature and questionnaire review) by EU and Chinese partners
- Review of ongoing EU and international projects
- Identify knowledge gaps
- Bilingual website
- Next steps: 2 workshops, final report 07/2009

Objectives of the conference

- Contribution of private, academics and authorities to the EU/China partnership (regulation and policies).
- Cross fertilization between the Straco2 actors and the stakeholders.
- Hurdles to be overcome

WP leaders

Safety and liability: Ton
